COVID-19 (novel coronavirus) update

Further to my letter dated 5 August 2020, as a valued Sundale team member, I wanted to provide you with an update and outline Sundale's current approach to managing the COVID-19 situation (formally known as novel coronavirus).

Yesterday, Queensland Health released Aged Care Direction (No.9).

Upon review, and consistent with Phase 2 of [Sundale's roadmap to easing restrictions](#), the organisation has chosen to implement the following:

Care Centres

Face-to-face communication between care recipients and their families and friends is again permitted at Sundale.

Face-to-face visitations will take place in a designated visiting room at each site or within Sundale's grounds.

To manage expected demand and to ensure as many families and friends can visit a loved-one who resides at a Sundale Care Centre, visitations may be capped at 30 minutes.

Care Centre visits are limited to a maximum of two visitors at a time per care recipient.

Visitors must register their intent to visit by contacting their Care Centre.

Palliative Care

Sundale will help organise visits for family members in Palliative Care or for the purposes of end of life support.

Continuing Conditions

The following conditions remain in place at Sundale's Care Centres. Visitors and care recipients must:

- Practice social distancing - stay at least 1.5 metres away from others;
- Make certain there is at least 4 square metres per person when indoors;
- Practice hand hygiene;
- Practice respiratory hygiene;
- Frequently clean and disinfect your environment;
- Be willing to undergo a screening process (including temperatures / previous travel).

Face masks

Sundale has also made the considered decision to provide reusable cloth face masks and/or single use surgical face masks to all Care Centre team members and visitors to help minimise the threat of COVID-19 entering a Sundale Care Centre.

Not permitted

In line with recommendations from the Queensland Government, visitors and team members should not enter a Sundale Care Centre if:

- They have been diagnosed with COVID-19 and have not finished their isolation;
- They returned to Queensland from overseas or interstate within the past 14 days;
- They have been in contact with someone who has had a confirmed case of COVID-19 within the past 14 days;
- They have been in a COVID-19 hotspot in the past 14 days; or have visited a Queensland COVID restricted area in the past 14 days;
- They have a fever or symptoms of a respiratory infection such as a cough, sore throat or shortness of breath.

Sundale will continue to take a responsible and considered approach to protect the health and wellbeing of its care recipients and team members to help minimise the threat of COVID-19 entering a Sundale Care Centre.

Yours sincerely,

Danielle Mackenzie
Sundale CEO
